“We Will Succeed”

10-2-2012

To All Interested,

Today, Ken Freeman spoke to our students on Choices. It was the best presentation I have witnessed in my 18 years as an educator. Not only was the topic extremely relevant and important with our students everyday lives but the way Ken relayed his message was absolutely amazing. He truly has a gift that our students could relate to and take to heart. Their response to him was so fun to watch and I found it inspirational and uplifting as well.

I was extremely impressed with how Mr. Freeman was able to fully engage our entire student body in his message. Our students were on the edge of their seats and interested with his every word. His ability to take students on a journey of laughter to heartfelt sorrow was incredible. His story and the way he presents his guidance is also very well received by high school age students. I can honestly say his advice today is going to have a positive impact on a great number of students individually and our school is a better place because of his presentation.

If I ever need someone to present a critical message to our students in the future, I would trust Ken Freeman to deliver it. I highly recommend him to speak to any group where a positive difference needs to be made. He definitely made a very lasting impression on all of us at Andrews High School.

Sincerely
